[Alessio Vuat]

Full-Stack Senior Developer

Professional Profile

A seasoned Full-Stack Senior Developer with over 20 years of experience in software development across various industries.
Passionate about programming since the days of the Commodore 64, I have transformed this passion into a successful career. My expertise spans from back-end to front-end development, with a strong focus on best development practices, design patterns, and SOLID principles.
Excellent interpersonal, organizational, and leadership skills allow me to collaborate effectively in teams and bring added value to projects.
